

OLEG KOROLEV

Python Backend Developer (Middle+) | Full-Stack Engineer

Moscow, Russia | +7 (999) 002-5637 | mail@okorolev.dev | Telegram: @okorolev_dev
GitHub: github.com/korolev-oleg | Portfolio: korolev-oleg.github.io/portfolio-v2/ | Setka: set.ki/kLYQDZX

PROFILE

Python backend developer with 4+ years of verified commercial development experience and 5+ years of relevant professional experience including university practice. Strong background in Python, Django, Django REST Framework, PostgreSQL, Celery, Redis, RabbitMQ, Docker, and REST APIs. Experienced in database and API design, JWT authentication, Keycloak configuration, Django ORM optimization, integration and unit testing, code review, and taking products from design through production. Additional full-stack experience with React, TypeScript, and Next.js. Interested in Backend and Full-Stack roles in product teams.

Employment: Full-time Work format: Remote or on-site Relocation: Open to relocation within Russia Business travel: Available

PROFESSIONAL EXPERIENCE

Full-Stack Developer

[Apple Vision Store](#) — [apple-vision-store.ru](#), Moscow | May 2026 - Present

E-commerce project focused on Apple Vision products and accessories.

- Developed full-stack product functionality, including the product catalog, dedicated product landing pages, and shopping cart.
- Integrated the storefront with an internal order and calculation system.
- Automated operational workflows covering orders, calculations, and payments.

Full-Stack Developer

[BestDoctor / Luchi](#) — Moscow | Nov 2025 - Jan 2026

Telemedicine and voluntary health insurance (VHI) services.

- Maintained and extended Python/Django backend services and JavaScript/React frontend applications.
- Analyzed the existing codebase and documentation, fixed defects, and implemented changes across frontend and backend modules.
- Performed daily code reviews for both frontend and backend code.
- Used LLM-based tools to analyze documentation and accelerate onboarding into the codebase.
- Automated the commercial proposal preparation process, freeing sales staff to focus on higher-value tasks.
- Configured Keycloak for new services.

Tech stack: Python, Django, Pydantic, Pytest, Celery, RabbitMQ, JavaScript, React, Effector, Chakra UI, TanStack

Full-Stack Developer

[Intelion Mine / Intelion Cloud](#) — Moscow | Nov 2024 - Jun 2025

GPU server rental platform for self-hosted AI models, media platform, and GPU comparison portal.

- Developed backend and frontend functionality using Django, React, and Next.js.
- Updated the GPUark frontend and redesigned sitemap generation for GPU comparison pages, improving search-engine coverage of GPU combinations.
- Implemented PDF generation for commercial proposals from HTML pages, improving document presentation.
- Configured Docker containers for the media platform.
- Enhanced the data crawler used to collect GPU information.

Tech stack: Python, Django, Wagtail CMS, Docker, Celery, Redis, PostgreSQL, TypeScript, React, Next.js, Tailwind CSS

Backend Developer

[ANV LLC / Akticom](#) — Samara | Aug 2022 - Aug 2024

Titan Control monitoring center for workforce and facility management, geotracking, SSE events, reporting, and training; approximately 2,500 active users.

- Contributed to application architecture, data-model design, and database design.
- Developed REST APIs and implemented JWT-based authentication.
- Optimized Django ORM queries.
- Proposed and introduced automated testing that simplified the API migration from v1 to v2.
- Configured Docker environments and supported the product through production deployment.
- Developed small FastAPI microservices for financial systems.

Tech stack: Python, Django, Django REST Framework, FastAPI, Celery Beat, Redis, Docker, PostgreSQL, TimescaleDB, REST, JWT, SSE, unittest

Python Developer

ProdLogistica LLC — Moscow | May 2020 - Dec 2021

Food distribution company; internal tools for tender and sales teams.

- Developed TendManager, an internal service that automated tender-processing workflows.
- Built a Django REST Framework backend for a mobile catalog with a shopping cart and wholesale-order transfer to 1C 7.7 through a Flask bridge running on a Windows server.
- Developed the prodlogistica.ru catalog website and small PyQt applications for internal process automation.
- Participated in the full delivery cycle, from business requirements and database design to production launch.

Tech stack: Python, Django, Django REST Framework, PostgreSQL, Flask, Win32 API, DevOps, PyQt5, JavaScript, HTML, CSS

EDUCATION

Bachelor's Degree - Applied Informatics in Economics

Moscow Witte University, Faculty of Mathematics and Information Technology — 2020

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, FastAPI, Flask, asyncio, Cython, REST APIs, WebSockets, SSE

Data & Messaging: PostgreSQL, TimescaleDB, SQL, SQLAlchemy, psycopg3, Redis, Celery, RabbitMQ

Testing & Delivery: Pytest, unittest, Docker, Linux, Git, GitHub, CI/CD

Frontend: TypeScript, JavaScript, React, Vue.js, Next.js, HTML, CSS

Security / Auth: JWT, Keycloak

LANGUAGES

Russian - Native | English - B1 (Intermediate)
